1. DATE - TIME GROUP 23 August 65 24/0040Z	2. LOCATION Jamestown, New York
3. SOURCE Civilian	10. CONCLUSION 1. Astro (VENUS) ✓ 2. INSUFFICIENT DATA FOR EVALUATION ✓
4. NUMBER OF OBJECTS Two	
5. LENGTH OF OBSERVATION 4 - 5 Minutes	11. BRIEF SUMMARY AND ANALYSIS
6. TYPE OF OBSERVATION Ground-Visual	<p>Object appeared as a silverblue light brighter than 1st mag. Located just above the horizon in West. Dusk. Clouds in the background. Object moved slowly to South and disappeared over the horizon. While on phone reporting this object a brilliant blue light was observed behind a barn about 1,000 ft away. This lasted for 4-5 minutes. This caused heavy static and distorted TV picture. Observer stated that he saw same thing two days earlier only didn't tell anyone.</p> <p>Case followed newscoverage on Cherry Creek sighting 19 Aug. Youth 15 yr old. Doesn't appear logical that he would report one object as he was doing by calling the Air Force and yet NOT report a more unusual sighting. 1st object setting in West VENUS. This Planet was on the horizon at 270 deg azimuth in the process of setting. 2d object more puzzling. Area searched and no evidence of object uncovered. SEE CASE FILE.</p>
